

CourseBuilder

New features

Tab Colours

Customising tab colours

In the past only a limited palette of colours was available for tabs. However, you can now customise the colours by entering their hex codes or by clicking on the palette icon.

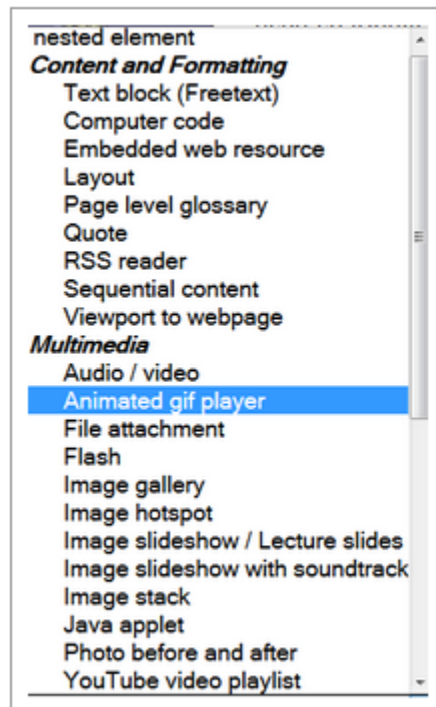

Right-hand Navigation

Fixed width theme: ?

Left navigation pane width: ? px, 100px ~ 350px. default 169 px or leave it empty to remain default

Navigation pane align: **left** ▾

Animated Gif player

Adding Gif Files

CourseBuilder now allows you to include animated gif files on your CourseBuilder pages.

Animated gif player is an element in the Multimedia section of CourseBuilder.

You can create your own animated gifs in Photoshop or by using software from the internet, or you can download free gif files from the internet.

Animated gifs can be use to grab attention, but they can also be irritating, so should be used sparingly.

Conditional Release

Hiding Pages - Conditional Release

With Conditional Release you can specify exactly when you want a page to become visible. A lecturer could therefore set the dates at the beginning of the semester.

This is a <input checked="" type="radio"/> main page <input type="radio"/> sub page of -----	
Short title: <input type="text"/>	?
Long title: <input type="text"/>	?
Website: <input type="text" value="http://"/>	?
Page shows in: <input checked="" type="radio"/> Side menu <input type="radio"/> Top menu <input type="radio"/> Both menus <input type="radio"/> Hidden	
Conditional release Show this page from <input type="text" value="08/07/2015"/> [format: dd/mm/yyyy hh:mm] ?	
Show page index: <input type="checkbox"/> ?	
Include print version: <input type="checkbox"/> (only visible in publish view)	
Copy content From: <input type="text" value="this course"/> -----
